Lead Abatement Certification

What exactly is the EPA requiring? Who is affected and why? Click on the EPA logo here to get information directly from the source!

ChemScope: Your Teachers

Home Improvement Contractors, the EPA, and homes constructed before 1978.

Dear Bob,

We're doing our best to get the word out on a very important ruling that has come down from the Environmental Protection Agency (EPA). As of April 22, 2010, new regulations come into being that require all contractors (home improvement contractors, remodelers, plumbers, electricians & painters) that would do work on pre-1978 homes with children in them (or the potential to have children in them) to be certified on abatement procedures and registered with the EPA. Read on to see what Washington Supply will be doing to make our customers lives easier.....

The owners of Washington Supply

February 3, 2010 and

Your educators are highly skilled certified instructors who will provide the education you need to pass the exam and be in compliance. When you pass the exam, you will be registered with the EPA, and we will deliver a certificate of completion to you.

ONLY ONE PERSON FROM A COMPANY NEEDS TO BE CERTIFIED.

For more information regarding the course content, please click on the Chem-Scope logo above.

The Journal of Light Construction

The article that can be linked to here by clicking on the logo of The Journal of Light Construction was the first "heads up" we'd seen regarding the new regulations. Many thanks to Jeff Thorson for bringing it to our attention! His observation was that it will add to the cost of projects, as well as make all homes dated 1979 or later....

Join Our Mailing List!

We know we've been lax in getting our email newsletter out. Many things have been happening here at The Supply, not the least of which has been the construction of our 15 Kilowatt photovoltaic plant (electricity production) and the

February 16, 2010

Classes will be held at Bryan Hall (Washington Town Hall - Land Use Room) on Lead Abatement and Mitigation for Contractors. Reserve a space early! There can only be 18 per class! Please call or stop by to reserve a space in either class and to obtain further information.

The classes will be from 8:00 am to 5:00 pm on the two days. Continental Breakfast,

installation of the solar thermal (heat production) array. The installation should be completely finished by the end of the year. We will have a formal "commissioning" event in the spring to introduce the new systems to the public - keep an eye on your email for more information.

Lunch and light afternoon snacks will be provided. These are two separate classes, and you only need a single class.

The classes will each have 3 instructors, allowing for break-outs into groups of 6. There will be classroom work as well as "hands on" work done at Washington Supply. There is a brief examination at the end.

Cost per seat is \$200. Please make your check payable to Washington Supply.

These new regulations seem to have flown under everyone's radar. We're hoping that by making it easier for our contractor

customers to get the training close to home that everyone will get certification they need. It just gets more complicated all the time...

Sincerely,

The Owners of
Washington Supply Company
